Dear Valuable Partners

Announcement of termination of PC-CON production

We would like to take this opportunity to extend our heartfelt appreciation to your continued support and patronage rendered to our company.

Today, we are to inform to you the termination of one of our product portfolios called PC-CON (Conductive Polymer Aluminum Solid Electrolytic Capacitors) produced by our affiliate company, Rubycon Carlit Co., Ltd.

Under your patronage in electric fields for many years, we have been making every effort toward cost optimization by expanding product series, offering new products and cost reduction by rationalizing production.

However, due to the intensive competition of the product development and cost down for Multi-layer Aluminum Solid Electrolytic Capacitors, we are obliged to terminate the production and sales of PC-CON to our customers as stated below:

It would be highly appreciated if you could kindly accept and consider to switch to other supplier or to purchase your whole required quantity at one time.

1. Items to be discontinued:

* Please see attached list

2. Discontinuation schedule

For those items, we will accept your last order till end of March , 2017.

Production will be ceased end of June 2017.

Last delivery will be end of September 2017.

Sincerely yours,

Shuichi Katsuyama
President
Rubycon Carlit Co.,Ltd

Osamu Yokozawa
