RESELLER UPDATE

SQ oscilloscope probes now CATII

Our SQ series of handsfree oscilloscope probes are now also certified by TÜV in Germany according to EN61010-031 for CATII 300V RMS handheld and handsfree measurements, this includes all variants SQ200, SQ350 and SQ500 probes delivered from us after 2023-11-11

The certified probes are marked CATII and the included updated userguide has information on how to use the probe with the supplied accessory in a safe manner as an CATII probe.

Probes not marked CATII (past deliveries) are not compliant to CATII and must not be used as such.
