Change of the form of delivery of the RJ45 plug connector – AAB140044
Please forward this information to your electrotechnical departments!

Dear Sir or Madam

In the course of our continuous improvement process, the RJ45 plug connectors mounted on patch cables will be delivered with dust protection caps to protect the contact area in unplugged condition.

Due to process-related reasons, with the first order, new articles will already be delivered with dust protection caps so that this can lead to mixed stocks.

Old production status	New production status
	

The existing stock can still be applied. The new version is expected to be delivered as of March 1, 2015.

Do you have any questions? You are welcome to contact our support engineer or the sales team in Blomberg.

Yours faithfully

PHOENIX CONTACT Deutschland GmbH
