**Change of the production process of the contact spring – PAA140021
Please forward this information to your electrotechnical departments!**

Dear Sir or Madam

In the course of our continuous improvement process, future contact springs will be manufactured without corrosive gas. As a result, the outer appearance of the contact spring changes as presented in the pictures.

The technical features, the plugging behavior and dimensions are not affected by this change.

The available stock can still be used. The new version will be delivered as of May 1, 2015.

Do you have any questions? You are welcome to contact our support engineer or the sales team in Blomberg.

Yours faithfully

PHOENIX CONTACT Deutschland GmbH
