New Design In Stop Notice

LXES15AAA1- Series

Dear. Valued Customer

Thank you very much for your great and continued support for business with Murata. This is the official notification that some of our products detailed below shall be out of sales promotion with the immediate effect. Please review this, and refrain from designing the products affected into your new models and projects. Your understanding and support are highly appreciated.

1. Product Type, Customer/Murata/Alternative Part Numbers:

Product Type: LXES15AAA1 Series
excepted LXES15AAA1-133 and 153.

Please refer to the attached documents for detailed Part Numbers' information.

2. Reasons/Background:

LXES15AAA1-017/075/100/112/117 includes the trivalent chromium (Cr) as an ingredient, which become an object for the Murata environment regulation policy. At the same time, the new calcination furnace setting is also considered, as it gets aged to work. Since the ingredient for Ceramic ESD without Cr have already in MP and succeeded cost reduction, we are planning to stop using the Cr-containing ingredient, which leads to the EOL of these items. Also, please be informed that these parts will be withdrawn as per the schedule below. The official notification of the Product Withdrawal will be submitted about one year later.

Last Time Order Due: Mar., 31, 2017
End of Production: May, 31, 2017
Last Date of Shipment: Jun., 30, 2017

3. Contact Window:

Should you have any questions or concerns, please contact Murata Sales, Representative, or Distributor in your area.

Truly Yours. Thank you.
