**4M Change Notice**

(Product Type)DHB, DHC,DHK, DHS Series

Dear Valued Customer,

Thank you very much for your great and continued support for business with Murata. This is the official notification that some of our products' 4M Change will be proceeded as detailed below. Please review this, and confirm that you will expect to receive products after this 4M Change. Your understanding and support are highly appreciated.

**1. Product Type, Changes, and Customer/Murata/Alternative Part Numbers:**

Product Type: Ultra High Voltage Screw Terminal Type Ceramic Capacitors for General Purpose  
Murata PN start from DHB, DHC, DHK or DHS

Changes:  Man  Machine  Material  Method

Before Change	After Change
DBP contained conductive adhesive	DBP-free conductive adhesive

Please refer to the attached documents for detailed Part Numbers' information.

**2. Reasons/Background:**

We have informed you that the target products contain DBP in the conductive adhesive. There is a plan that DBP will be restricted by EU-RoHS Directive from July, 2019. To comply this new RoHS Directive, we decided to change the conductive adhesive to DBP-free one for the target products.

**3. Products Before and After the Change:**

There is no difference in the products design, quality and guaranteed specifications, because we will continue to produce them in the same design with the same production process and quality control system.

**4. Change Schedule:**

Delivery of products will start Feb.01.2018

**5. Contact Window:**

Should you have any questions or concerns, please contact Murata Sales Representative, or Distributor in your area.

Truly Yours. Thank you.
