

## Product discontinuation

PCN No.	AAA140079	Date	22.11.2017
Product	MC 1.5...		

### Description of the change

It is our objective to provide you with current products for your application. To this end, for economic and technical reasons, it is necessary to review the product portfolio and adapt the product lifecycle regularly.

For increased reliability in the automated assembly process, the following products in the MC 1.5/...-G(F) will receive new band packaging. The width of the band is being reduced from 56 mm to 44 mm and the cavity distance is being increased from 12 mm to 16 mm. This reduces the packaging units from 470 count to 330 count.

The old MC 1.5 products documented in the annex are discontinued as of 2017-11-01.

### General schedule

Last order	Last shipment
