1. ECR #: 164364
Notification #: 333

2. Date of Announcement: February 14, 2018

3. Series:
• SSM - .025 SOCKET STRIPS

4. Part #'s Affected
• SSM-1XX-XXX-DV-XX-XX-XXX-XX

5. Description of Change:
Void Coring features were updated to the top side of the body for improved flatness.

6. Method of Identifying Change

The change in void coring can be visually identified, without magnification, by viewing the top side of the part.

7. Reason for Change:

Void coring was modified in order to improve the flatness of the body during the molding process.

8. Impact of Change on Form, Fit, or Function:

- Form - this is a visual change only. There are no performance differences with this product change.

9. Projected Implementation Date: June 10, 2018

Disclaimer

Please review the change notification details listed above for specific information regarding the nature and timing of the change. While Samtec has taken precautions to ensure this change is not detrimental to your application, each application can be unique and therefore customers should consider the effect of the change on their specific application.

Samtec has taken efforts to ensure that all users of this product who have requested change notifications have been informed. However, you should assume that this is the only notification that will be sent and you, as the recipient, must determine how to communicate this information to your organization(s) and customer(s) as appropriate. If you wish to opt out of receiving Samtec Engineering Change Notification emails, please contact CustomerECN@samtec.com. Due to technical progress, specifications are subject to change without notification and it is recommended to provide an alternative contact when opting out.

Please contact Samtec at CustomerECN@samtec.com for any questions related to this change.
