Reduction in size of one impression on the rear side

In order to optimize the production process, one of the impressions on the rear side of the housing will be reduced in size. The change can be found on the left-hand or right-hand side of the product. This change will not affect the external dimensions, PCB layout, or technical data. Depending on the amount of stock and the number of positions, both versions will be supplied in parallel during the changeover phase.

Expected initial delivery of the changed products	2019-02-01
