Locking protection for the RJ45 connector

To improve the service life of the interlock, the products stated in the attachment will be fitted with a locking protection. In addition to this, the dimensions of the connector and the color of the sleeve housing will change slightly. The CAT5 connections feature a transparent front, the CAT6 connections feature a blue front. Due to tool wear, this change has to be implemented at short notice. None of the changes affect the transmission values.
