Notice of Production Transfer of 4-pin type Snap-in Al. Electrolytic Capacitors

Dear Valuable Customers,

We would like to take this opportunity to extend our heartfelt appreciation for your continued support and patronage to Rubycon Corporation.

4-pin type Snap-in Capacitors are produced by special production equipment due to the unique size and terminals. Currently, we are facing low production due to decrease in production volume. Therefore, we find it necessary for us to consolidate the production plants. We have made the decision to transfer and integrate the production facilities to Rubycon Indonesia.

1. Items to be transferred

400UFG1000MBNK3585P

2. Schedule of transfer

Current production in our HQ factory in Japan will be discontinued by the end of December 2019. After transferring equipment, new production in Rubycon Indonesia will begin in January 2020. The production equipment, process and materials are unchanged, only location will change.

Because we transfer the current facilities to Indonesia after stopping production in Japan, sample requests for 4-pin products, made in Indonesia, will be unavailable prior to the factory change. If you need to approve new production line in Indonesia or sample, please consider your demand for your approval time period and place order in advance. We request to receive your order by the end of July 2019.

We appreciate your kind attention and consideration to this change. Please contact your local Sales office with any questions or concerns.

Yours Sincerely,

Eloy Argudo Montes.
