Betreff: Weller SKU simplification COMMUNICATION 2019

June 2019

Dear Weller Partner,

An error has crept into our communication from earlier today. Please find here below the **corrected** communication:

Like we informed you previously, we are continuously working on improving our product portfolio. Our goal is to make ordering as easy as possible for you as our partner.

Therefore, we have decided to combine different country variants into one article number and to simply enclose the different power cables. So you don't have to find the right country version for your product in a complicated way anymore, but you can order it with only 1 article number.

What do you have to do now?

Please have a look at the attached article list and replace the red marked article number and description by the green marked article number and description. Your product data will be up to date and your customers will receive the right product.

Please be so kind to update your systems by the EOL date and from that date only order the new article numbers.

EOL: 26 July, 2019
Last time buy: 26 July, 2019
Last time shipment: 30 August, 2019

If you have any questions, please do not hesitate to contact us.

New Weller RT Active Tips

We would like to take this opportunity to inform you once again that we have expanded our portfolio of active soldering tips. In this context, the already existing RT soldering tips have been adapted to the naming of the new RT soldering tips.

Please find this information in the attached Master Data File.

Best regards

Your Weller Team
