**LF PCN A0174 Notification of foil supplier change (Supplier Bankruptcy).**

Dear Valued Customer,

Littelfuse would like to notify you the change of our current foil supplier API Americas Inc. because they have notified that they have declared bankruptcy, therefore the foils they provide will be no longer available.

This foil is used for fuse rating marking and is used on some of our automotive fuse families.

As part of our process to maintain and ensure our Business Continuity Plan, Littelfuse is taking the following actions:

Littelfuse is adding a foil source which will replace the current one. This action is taken to provide protection against supply disruptions for our customers. Adding this foil source will have no impact on form, fit or function of the materials. No other change is going to be made to the products.

Littelfuse is working on the corresponding validation plan to ensure the right performance of products. Test results will be available and shared accordingly upon request.

This will be a running change and production orders will not be affected at all (all orders will be covered accordingly).

Target implementation date for the new supplier is April 1, 2020.

Impacted Materials: See Excel spreadsheet "A0174 PCN Foil Supplier Change - Impacted Materials".

Please contact your local Littelfuse representative if you have any additional questions. We will be pleased to answer any questions you may have. Thank you for your continued support.

Best Regards,
