

Title of Document:	Request for Change	Issue No. G21-05870	Rev. 1
Customer:		Issue date: September 7, 2021	
Title subject:	PA 9T GN2330-1 KW011 manufactured by Kuraray Change to alternative materials due to toning agent supply restrictions	Revision date: October 1, 2021	

We have been informed by Kuraray, the manufacturer of the toning agent used in the above-mentioned subject material, that the supply of toning agent to Kuraray has been restricted and that it is difficult to produce the same material. Therefore, we would like to change to an alternative material from the current material as follows.

1. Target product

1.25FJX, APSH, CIF, CPT, FWG, GEZ, GH, GH2, GHD, KCC, KPSH, NSHD, PA, SHLD, SHLD2, SHLV, SUR, XSR, ZE, and ZND connectors <See appendix for part numbers.>

2. Timing of the change

Shipment is scheduled to start in October 2021.

3. Contents of the change

The material of the products in Section 1 shall be changed from "GN2330-1 KW011" to "GN2330-1 NA without toning agent". According to this change, the connector performance and the overseas standards remain unchanged. In addition, the color tone will be changed as follows.

Before change After change

Photo: Comparison of color tone with GH connector <e.g.: Top surface of S05B-GHS-TB (LF)(SN)>

4. Reason for the change

This change will be carried out because the material manufacturer is difficulty of procuring the raw material (toning agent).

Your thought understanding and consideration would be very much appreciated.

Prepared by: <i>A. Okuni</i>	Checked by: <i>M. Ueda</i>	Reviewed by: <i>M. Arai</i>	Approved by: <i>T. Fujiwara</i>
