|  A 3D CAD model of a square flange component with four mounting holes. It features a central circular opening with a flared, multi-ribbed outer edge. The model is shown from an isometric perspective. |  A 3D CAD model of the same square flange component, but with a modified central opening. The inner bore is now a simple, straight cylinder, and the flared outer edge has been flattened into a single, smooth ring. The model is shown from an isometric perspective. |
