

Notice of Changes with Packaging and Packaging Waste Regulation (PPWR) (EU)2025/40

17th July 2026

Dear Valued Customer,

with effect from the **12th of August 2026, the new EU Packaging and Packaging Waste Regulation (PPWR)** will come into force.

As a manufacturer of packaged products in the market, we are legally required from this date to maintain and uphold the visibility and traceability of all packaging and documentation thereof.

For this purpose, our standard packaging and labelling will be slightly improved to accommodate all requirements.

Product Packaging:

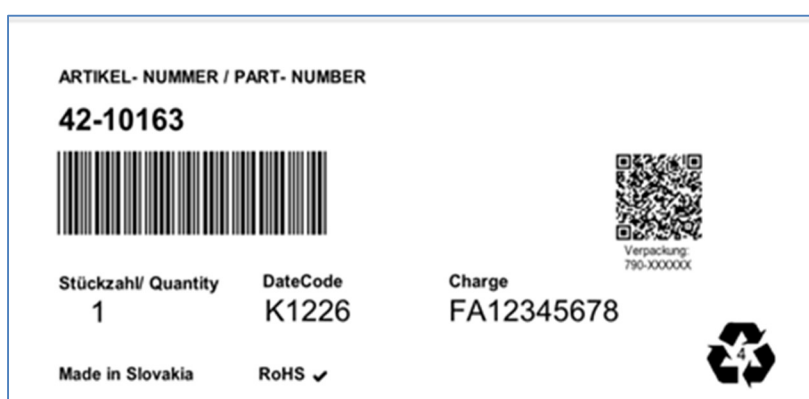

Standard Labelling including the following information:

Article, charge and/or serial numbers, Quantity

NEW QR-code containing:

- Name, Address & Email of manufacturer
- Identification number of the product packaging article number

Examples of the standard product packaging label:

PPWR Certification - Declaration of Conformity

We will provide certification that the supplied packaging complies with the requirements of PPWR on specific request.

The confirmation will include:

- Clear identification of the packaging (type, batch, series).
- Name and address of the manufacturer or authorized representative.
- References to the applicable legislation (PPWR) and the harmonized standards used.
- Compliance with the heavy metal limitation defined in article 5 (4)

Sustainability and environmental awareness are core values for CONEC.

Our goal is to actively contribute to the reduction of pollutants through environmentally friendly and future-proof solutions. This measure underscores our commitment to sustainability and environmental protection, while at the same time ensuring a legally compliant and long-term secure product strategy.

Should you have any questions, please feel free to reach out to us.

With best regards,

CONEC Elektronische Bauelemente GmbH
