PP-H 2,5 - Additional
tool & change of the
marking area**

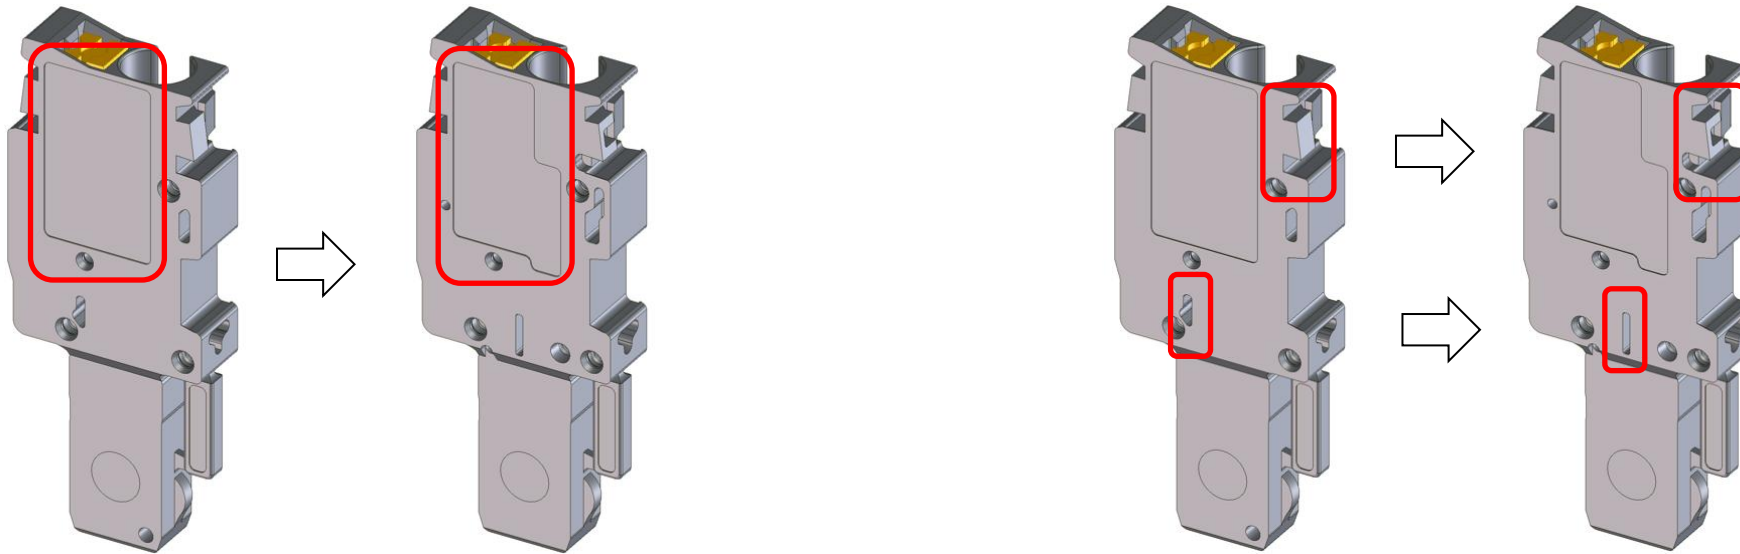

Agenda

- Background
- Old & New
- Article list & Version code
- Schedule

Background

Additional production tool & slight changes in the marking area

In order to meet the increased market demand for the PP-H 2.5 COMBI plug, new tools are being built for the products. This also involves making sensible changes to the product that improve functionality and/or production capability. In this case, the marking area is slightly changed and 2 visible contour changes will be implemented. The changes have no influence on the functionality, on the technical specification and the articles are backward compatible and can be combined with former versions.

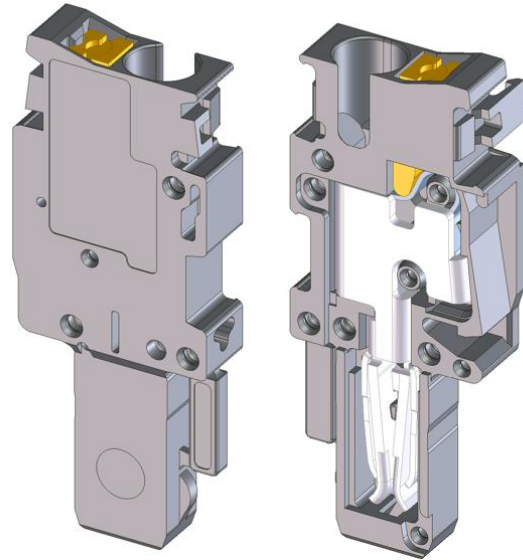

PP-H 2,5 - Additional tool & change of the marking area

Old & New – Changes in detail

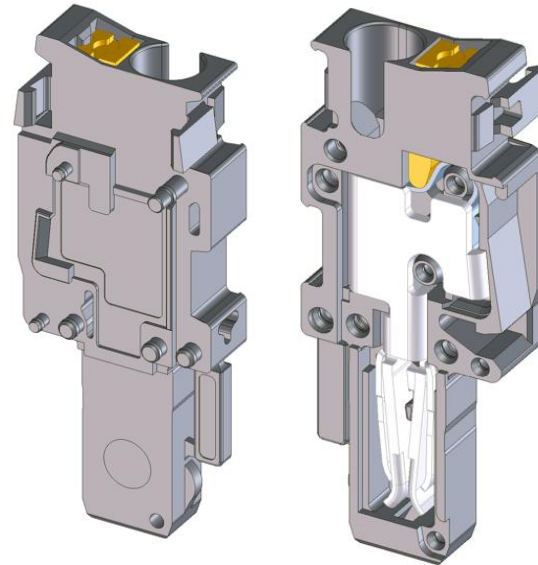

PP-H 2,5/1-L and similar old

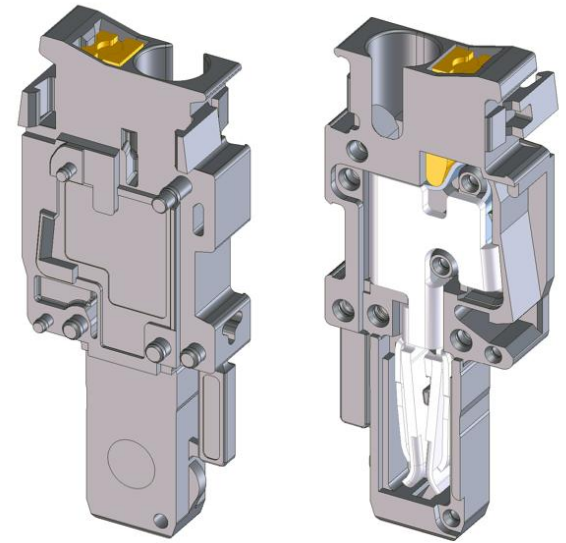

PP-H 2,5/1-L and similar new

PP-H 2,5/1-M and similar old

PP-H 2,5/1-M and similar new

PP-H 2,5 - Additional tool & change of the marking area

Schedule

EOP:

The effective date for the changes will be the

15.01.2027

At this time, we will switch production to the new version code. A packing unit will only contain products from one version code, but deliveries containing several packing units **may contain** packing units with different version codes!

Project Complete data

The data base of the project complete software will be updated with the Spring 2027 release.

ClipX Engineer data

The data base for the ClipX Engineer will be update immediately with the EOP date(approx. 2 days later)
