

Product change notification (PCN)

Title / short description	SACC with Screw Connection - Change to leadfree
Affected article category	Sensor/actuator cabling
Change category	Material, Form and appearance
Change number	CAF260072-00
Reason for PCN/PDN Revision	

Purpose/objective of the change

In compliance with global environmental regulations and to ensure future product availability, the copper alloy (brass) base material used for our M12 connector components is being transitioned to a completely lead-free alternative (< 0.1% Pb by weight). This proactive adjustment ensures long-term compliance independent of the declining RoHS Exemption 6c

Detailed description of the change

The change to lead-free material brings a different visual colour of the surface (see attached pictures). The material optimization has no impact on form, fit or function in general. Also no approvals or technical ratings of the products are changed. Backwards compatibility is fully guaranteed. Only one small optical change is made together with change to lead-free material: the knurling is now a bit more coarser for better manufacturability and better handling for assembly. No dimensions or toolings are changed beside. The change to lead-free ensures long-term compliance without RoHS exemptions. For optical differentiation the V/C level is increased.

Identifying characteristics

Increased V/C on packaging label

Start of Production (SOP)	-	Last Time Delivery (LTD)	-
Effective date (EOP)	2026-09-01	End of Service (EOSR)	-
End of Sales (EOS)	-		

Short-term change (< 6 months) or discontinuation (< 12 months), due to:

- | | | |
|---|--|--|
| ☐ Software / Firmware Bugfix | ☒ Short-term delivery stop by supplier | ☐ Short-term recall by supplier |
| ☐ Force majeure | ☒ Product improvement with customer benefits | |
| ☐ Others | | |
