Betreff: Murata PTN (Product Termination Notification), Ref.-no. MODI-816
Anlagen: MODI-816_notice of discontinuance.pdf

Notification of discontinuance - The obsoleted models of GYROSTAR will be discontinued.

Dear Ladies and Gentlemen,

for Murata it is self-evident in sense of partnership, to inform each concerned customer when products will be modified or discontinued.

With this letter we like to inform you about the following discontinuation:

Subject:

Discontinuation of Angular velocity sensor (Gyro sensor)

Murata p/n`s (series):

ENC-03M-series

ENC-03R series

Letter and your concerned part numbers / Murata p/n`s:

Please consider, that the mentioned parts includes sample deliveries as well as mass production sales items.

In some cases the orders have been placed by Murata part number and thus no customer part number is available.

Customer part number	Murata part number
-	ENC-03RC
ENC-03RD	ENC-03RD

Reason of the discontinuation:

Over five years have passed since piezo 1-axis GYRO ENC-03M series and ENC-03R series were released. We are afraid that these products can't meet the market needs. Production volume decreases significantly. And we can't maintain mass production line due to aging equipment.

Date of last order:

June 28, 2014

Stop of production:

September 29, 2014

Please reply about your attention to this notification.

In case of no reply within June 28, 2014, we will proceed with this discontinuation on schedule.

Vielen Dank und mit freundlichen Grüßen

Thanks. With kind regards

Jan Urbanc
