Product discontinuation

Please forward this information to your electrotechnical departments and/or customers!

Dear Sir or Madam,

It is our target is to offer modern products for your application. For economic and technical reasons, it is therefore necessary to remove components from our delivery program from time to time.

We herewith inform you on the discontinuation of the articles and accessories listed in the annex. For your foreseeable demand of spare parts, you still have the opportunity to order the respective discontinued products. Please see the annex for information on the last possible order and delivery dates.

After discontinuation, we aim at ensuring the supply with replacement parts for a sufficiently long period (usually ten years). This period, however, cannot be guaranteed since some modules depend on the supply of different components. This supply can only be influenced to a limited extent.

We would be happy to support you with the conversion of your machine or system configuration. For further questions or making appointments, please contact our field representative or us. We would be glad to assist you.

Thank you very much for your understanding. We are looking forward to a continuing good cooperation.

Kind regards,

Phoenix Contact Deutschland GmbH

i. A. Matthias Otten

Annex to the discontinuation May 2014
