Modification of the O-ring of the below listed range of articles
Please forward this information to your electrotechnical departments!

Dear Sir or Madam,

In order to achieve tightness when plugged in, the contact carriers for the pin versions will be equipped with an additional groove for an optional O ring. A corresponding bevel is intended in the rear section of the insulating body of the female version which also allows the accommodation of an optional O ring. For this, the lead-in chamfer at the housing of the female version will be enlarged. All technical details as well as dimension will not be affected by this modification.

Previous product	New product
<p>Female</p> 	<p>Female</p> 

Previous product	New product
Male 	Male 

The new design is already available.

Do you have any questions? Our consulting engineer or the sales team in Blomberg will gladly be at your disposal.

Kind regards,

PHOENIX CONTACT Deutschland GmbH
