Product modification
Please also inform your electro-technical departments!

Dear Sir or Madam,

You purchase M8 / M12 sensor/actuator cables with corresponding UL approval from us.
The UL approval is indicated by a special label on the cable.

The present marking method in thermo transfer printing is changed to inkjet printing. The advantages are the clearly improved abrasion and smear resistance of the label.
With cable lengths that are 50 cm or shorter, the thermo transfer printing will also be used in the future for technical reasons.

Of course the UL approval itself will not change due to the printing modification.

UL lable old	UL lable new
	

With regard to products that are affected by the modification and relevant to you please see the attached list. **The conversion shall take place during the 3rd quarter 2014.**

Do you have any questions? Our consultant engineer or the sales team in Blomberg will readily help you.

With kind regards

PHOENIX CONTACT Deutschland GmbH

i. A. Tobias Wermke
