Notice of production discontinuance of YK / YXA series

We would like to take this opportunity to extend our heartfelt appreciation to you and your esteemed organization for the continuous support rendered to our company.

Currently we produce an extended range of products with many size variation so as to satisfy a customer's demand.

However, with regard to YK/YXA series which had been longtime main runner as standard products, in order to realize efficient production and supply, we would like to integrate its production into new series PK/PX series.

Therefore, we are obliged to discontinue this production as stated below:

1. Items to be discontinued:

Aluminum electrolytic capacitors : YK series (85°C, Lead wire type)
YXA series (105°C, Lead wire type)

2. Schedule of the discontinuation.

→ 30, September, 2012.

3. Alternative items:

YK series → PK series
YXA series → PX series

We are ready to prepare necessary documentation for this change upon your request and appreciate for your kind attention and understanding by considering the difficulties in terms of our material preparation and its cost structure.

For further details, please kindly consult with our local sales office for your company.

Thank you very much in advance for your understanding and cooperation.

Sincerely yours,
