Modification of the packaging volume
Please forward this information to your electrotechnical departments!

Dear Sir or Madam

You purchase different COMBICON PCB connection elements from our product range. The packaging unit mostly is 50 pieces.

As of July 2013, we will meet the many requests to increase the packaging volume. Thus, we accommodate the idea of environmental protection and save resources. In doing so, the packaging volume will decrease significantly.

As regards the 2- to 5-position products, the packaging volume will be increased to 250 pieces and the 6- to 10-position products to 100 pieces. The new cardboard boxes will additionally be marked by a colored label. The technical features of the terminal blocks are not affected by this change.

Please find enclosed a list of the products with the corresponding packaging volume.

Do you have any questions? You are welcome to contact our support engineer, or our sales team in Blomberg.

Yours faithfully

PHOENIX CONTACT Deutschland GmbH
